

ADVANCED COMMUNICATIONS FOR ENGINEERS

Course Outline

Our advanced communications training program for engineers consists of the following categories:

1. Background on understanding evolving skills 'gaps' in engineering
2. Making people communicate effectively across the world
3. Self-directed Technology-based learning for engineers.
4. Facilitating effective inter-personal communications
5. Facilitating teamwork on a single virtual platform or workspace
6. Integrating workflow processes
7. Coordinating the latest engineering changes and updates
